Portfolio: busydetective.github.io | Fiverr: fiverr.com/sellers/kaivan_1

PROFESSIONAL SUMMARY

Cybersecurity professional focused on offensive security, web application penetration testing, and vulnerability assessment. Hands-on experience building real-world security tools including AI-powered reconnaissance systems, vulnerability scanners, phishing simulation platforms, and intentionally vulnerable training environments. Experienced with OWASP Top 10 testing, Flask-based security tooling, automated reporting workflows, and freelance client security assessments. Seeking remote Junior Penetration Tester, Application Security Analyst, or Cybersecurity Analyst roles.

TECHNICAL SKILLS

Security Tools	Burp Suite, OWASP ZAP, SQLMap, Metasploit, Gophish, SET, Nmap
Programming	Python, JavaScript, HTML, CSS
Frameworks & Libraries	Flask, BeautifulSoup, ReportLab, Matplotlib
Platforms	Kali Linux, VMware
Core Concepts	OWASP Top 10, SQL Injection, XSS, CSRF, Reconnaissance, Vulnerability Scanning, Risk Analysis

PROJECTS

AI Bug Bounty Recon & Vulnerability Scanner

- Built an AI-powered reconnaissance and vulnerability assessment platform using Python and Flask.
- Implemented subdomain enumeration, live host detection, endpoint discovery, and multi-threaded fuzzing.
- Developed automated vulnerability detection workflows for XSS, SQL Injection, and Open Redirect testing.
- Generated professional PDF reports with risk classification and visual analysis.
- Simulates real-world penetration testing workflow from reconnaissance to reporting.

Web Vulnerability Scanner (Flask)

- Developed a Flask-based scanner capable of detecting SQLi, XSS, and CSRF vulnerabilities.
- Implemented automated form parsing, payload injection, and severity classification.
- Added automated PDF report generation to simulate enterprise VAPT workflows.

SQL Injection Playground with Detection Engine

- Built a multi-page intentionally vulnerable web application for SQL injection testing and demonstrations.
- Integrated detection logic and payload validation to simulate attack and defense scenarios.

ADDITIONAL PROJECTS

Steganography Tool (Python GUI)

- Developed a GUI-based steganography tool to hide and extract text/files inside images using LSB technique.
- Integrated AES encryption and image-based secure data handling workflows.

PhishGuard – Phishing Detection Browser Extension

- Developed a browser extension capable of identifying suspicious URLs using heuristic analysis.
- Implemented real-time phishing alerts for malicious or deceptive domains.

EXPERIENCE

Cybersecurity Intern – Elevate Labs (Remote) | Jun 2025 – Jul 2025

- Performed structured security assessments on custom-built web applications.
- Identified SQL Injection, XSS, and CSRF vulnerabilities with remediation guidance.
- Assisted in testing and documentation for web vulnerability scanner workflows.

Cybersecurity Intern – Future Interns (Remote) | Apr 2025 – May 2025

- Conducted penetration testing exercises on OWASP Juice Shop and DVWA environments.
- Executed phishing simulations using Gophish and Social-Engineer Toolkit.
- Assisted in Wi-Fi hardening and threat analysis exercises.

Freelance Web Security Tester – Fiverr | 2025 – Present

- Performed manual web application testing for freelance clients.
- Identified authentication weaknesses, misconfigurations, and input validation flaws.
- Delivered structured vulnerability reports with remediation guidance.

EDUCATION

Bachelor of Computer Applications (BCA)

BYK College of Commerce, Nashik | 2021 – 2024 | CGPA: 6.89

CERTIFICATIONS

- Offensive Security Pathway – TryHackMe
- Penetration Tester – Cybrary
- InfoSec Analyst Virtual Internship – BABLI IT Consulting
- Internship Certificate – Elevate Labs
- Internship Certificate – Future Interns
